

Chief Internal Auditor Program (CIA)

PROGRAM OVERVIEW

In today's fast changing and heavily regulated world, the role of the Chief Internal Auditor has become a more crucial part of the governance framework and is now truly under the spotlight. This course will provide the Chief Internal Auditor with practical guidance aimed at strengthening their profile within their organisation and getting the best out of the range of assurance resources available to them.

The course will enable the Chief Internal Auditor to recognise and develop the skills which drive best practice in their industry, with particular emphasis on teamwork, stakeholder management, quality assurance and continuous improvement.

The course will also enable Chief Internal Auditors to better deliver against increasingly demanding objectives set by their own management and Audit Committees. Case studies bring the learnings to life and, combined with delegates own experiences, help ensure the material is insightful, relevant and can be shared with their teams.

LEARNING OUTCOMES

- You will improve your performance, profile and reputation as a Chief Internal Auditor.
- You will develop your skills to communicate better in the Boardroom, both verbally and through improved and more insightful reports.
- You will learn best practices for enhancing the performance, impact and credibility of your internal audit team.
- You will understand the challenges facing today's Chief Internal Auditors and get practical guidance and real life examples of how to meet them head on.
- You will identify the range of assurance sources in your organisation and how to best reflect these in more effective audit planning and reporting.
- You will develop approaches to plan and audit more complex areas such as culture, change, cyber and strategy.

WHO SHOULD ATTEND

This highly interactive programme is designed specifically for:

- Chief Internal Auditors
- Heads of Internal Audit or Audit Executives
- Incoming Chief Internal Auditors
- Future or Aspiring Chief Internal Auditors
- Risk Management and Compliance Officers
